

Achieving the **unattainable** is  
what *inspires* us

**KHD HUMBOLDT WEDAG**  
is a proud partner of  
**SHREE CEMENT**  
in completing the commissioning of  
Line-VII of  
1.0 MTPA Clinkerisation capacity in a  
**world record time of**  
**367 days**

**Today is a historic day.** Exactly a year before, we decided to setup an additional production facility at Bangur City, Ras, Rajasthan.

A completion target of 15 months was set initially, subsequently revised to 12 months,  
which industry experts termed as impossible considering the global benchmark of 21 months.

Today, we have achieved the unattainable by executing the project in just 367 days (~12 months) and lit up its commissioning torch.

**We have created a world record.**

————— *SUCCESS Highlights* —————

- Execution of six-stage pre-heater - Within a record time of 8 months ■ Completion of erection work - Only in 6 months ■ Delivery of equipments - 7 to 11 months
- Raw Mill & Coal Mill parts (97 MT) were airlifted from Germany instead of the sea route, which was for the first time in the Cement industry

Achievement of such astounding proportion would not have been possible without the relentless efforts of various vendors, contractors,  
project team and Shree's management at large.
